

# SCAVENGER HUNT [family activity]

As a family choose your favorite forest or a new trail you've never been to. Print out this scavenger hunt and go on the search together for everything on the list. While you're out in the woods share how the water cycle works, how it affects the forest you're in, and how it is like your family. Most of all... have fun and laugh a lot. Happy Trails!

# SCAVENGER HUNT

**three different color leaves**

**a brown bird (what kind is it where you live)**

**some onion grass**

**a squirrel**

**find the tallest tree in your woods**

**a seed (what will grow from it?)**

**the biggest leaf in the forest**

**a place where the animals may drink water**

**some animal poop (what animal did it come from?)**

**listen for two bird songs**

**find something that is green (that is not grass)**

**search out the smallest tree**

**are there still crickets out this time of year?**

**name three sounds you hear**

**make something useful from 3 things out in the forest**

**find a rock that looks like a heart**

**look for some moss on the side of a tree**

**what insects do you see?**

**go to a trail you've not gone on before**

**pick up 3 pieces of litter**

**think of one word that describes how you feel about the forest**

**pick an object from the woods that reminds you of your family; tell your family why you chose it**
